Professional Summary

Full stack developer with 1.5+ years of experience building scalable web applications using Next.js, Node.js, PostgreSQL, and Redis. Developed AI-powered platforms integrating Google Gemini APIs, embeddings-based retrieval, and performance optimizations that reduced API response times by **30%**. Open source contributor with 10+ merged pull requests and experience delivering production-ready applications used by real users.

Technical Skills

Frontend	Next.js, React, TypeScript, Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, REST APIs, JWT Authentication, EJS
Databases	PostgreSQL, Redis, MongoDB, Supabase
Languages	JavaScript (ES6+), TypeScript, Python, Go (Golang)
AI / APIs	Google Gemini API, OpenAI API, Embeddings, Prompt Engineering
Tools	Git, GitHub, Linux, Vercel, Postman, Agile/Scrum

Experience

Freelance Full Stack Developer Jan 2024 – Present
Self-employed • Remote

- ❖ Delivered 4+ production-ready web applications for small businesses using Next.js, Node.js, and PostgreSQL, all publicly deployed with active users.
- ❖ Reduced API response times by approximately 30% through Redis caching and PostgreSQL query optimization while implementing JWT authentication and secure deployment pipelines.
- ❖ Integrated Google Gemini APIs for AI-powered document intelligence features using embeddings-based retrieval and contextual response pipelines.

Full Stack Developer Intern Jun 2024 – Aug 2024
Softpro India Pvt. Ltd. • On-site

- ❖ Built an internal analytics dashboard using React, Express.js, and PostgreSQL with secure JWT authentication.
- ❖ Collaborated within a 6-member development team using GitHub workflows and Agile sprint planning to deliver analytics modules on schedule.

Open Source Contributor – Level 4 Oct 2025
Hacktoberfest 2025

- ❖ Contributed 10+ merged pull requests across open source repositories focused on REST API improvements, authentication systems, and technical documentation.

Projects

PDF Analyzer | AI Document Intelligence Platform Live
Next.js • Google Gemini API • PostgreSQL • Embeddings • Vercel

- ❖ Built an AI-powered PDF question-answering platform using Google Gemini APIs with embeddings-based retrieval and document chunking.
- ❖ Implemented asynchronous streaming responses and caching strategies to reduce redundant API requests and improve user experience.

OtakuList | Anime Discovery Platform Live
Next.js • Node.js • Redis • PostgreSQL • Jikan API

- ❖ Reduced external API calls by approximately 40% using Redis caching, debounced search, and batch-fetching techniques.
- ❖ Developed dynamic filtering, routing, pagination, and timezone-aware scheduling optimized for Indian users.

Next.js • Node.js • PostgreSQL • Vercel

- ❖ Developed a budget-focused travel planning platform featuring AI-assisted itinerary generation and route optimization.
- ❖ Designed a fully responsive interface and improved navigation flow and Core Web Vitals performance after deployment.

Education

Master of Computer Applications (MCA)	2025 – 2027 (Pursuing)
Shoolini University of Biotechnology and Management	
Bachelor of Computer Applications (BCA)	2021 – 2024
HR Institute of Science & Technology, CCSU	63.48%

Achievements & Extras

- ❖ Hacktoberfest Level 4 contributor with 10+ merged pull requests across authentication systems, API design, and developer tooling.
- ❖ All major projects are live in production with end-to-end deployment using platforms such as Vercel, Redis Cloud, and Supabase.
- ❖ Currently expanding backend expertise through Python (FastAPI) and Go (Gin, concurrency patterns).
- ❖ Consistent GitHub contribution history with publicly available project repositories.
